THE REVOLUTIONARY MULTI-MISSION SPECIAL RESPONSE TRAILER

Moving equipment by air presents unique challenges. When resources are at a premium and every minute matters, you need a storage and transport solution that eliminates complexity and frees you to do mission-critical work. The Nomad-engineered C-130 ATTLA Trailer is roll-on ready at a moment's notice. Aircraft Loadmasters will appreciate that no additional shoring is required and that space is maximized, both within the aircraft and the trailers themselves. The 16-foot units can be configured for a wide array of missions, from simple storage, to climate-controlled, connected workspace. Whatever your mission, when every minute matters, the field-tested build quality and operational versatility of a Nomad air transportable trailer cannot be matched.
